

Troubleshooting

- [Linux journalctl](#)

Linux journalctl

```
journalctl --list-boots
```

to get a specific boot, specify the ID of the boot from the list you got

```
journalctl --boot=-1
```

to get just error specify the log level

```
journalctl --boot=-1 -p err
```

or for example to get log levels 1 - 4

```
journalctl --boot=-1 -p 1..4
```

specify `-x` to add explanations where it can, specify `-r` for reverse order

List boots

journalctl --list-boots | xclip -sel clip
