

ADS - Installing Security Service Pack

Sometimes ADS require to have patches installed, here is the procedure followed to install Avaya Diagnostic Server 4.0 Security Service Pack SSP #2, detailed instructions can be found in

<https://download.avaya.com/css/public/documents/101081346>

1. Download service pack file from Avaya and uploaded into Avaya Diagnostic Server 4.0 (in this example, file was uploaded to /home/admin folder)
2. Extract the file using ***tar -xvf ADS_SAL_SLAMON_PM40_SSP_002_01.tar.gz***
3. Current SSP version can be verified using ***/opt/avaya/common-os/bin/av-version***
4. Run the patch installer using ***./apply_ssp.sh AV-ADS4.0-RHEL8.4-SSP-002-01.tar.bz2***
5. Verify the new SSP version ***/opt/avaya/common-os/bin/av-version***
6. Reboot
