

# System Manager Logs

Navigate to /var/log/Avaya/mgmt/

LS directory

```
root >ls
ads          conf         gls          ip-fqdn     mediaserver  pem          reports      sdm          spm          um_bulkexport
abg          discovery   gs          iptcm       mgmtwebservice  pif         resource     securityserver  statustracker  um_bulkimport
alarms       dodenv      harvest     iptcmessaging  mcs         presence     resources    smgrds       sum          upm
asm          downloads  healthmonitor  lifecycle   monitor      provisioning  restartCrashedJBoss.log  snmp          swgmt       upr
authz        drs         IAM         logging      nrp          quantum      rts          spirit         TenantMgmt    vmgmt
comet        dse         infra       loggingui    officelinx  rbac         scheduler    spirithome   tm            weblm
CommonConsole geo         inventory   logs         orchestrator RemoteSNMPConfig  sdk          spiritlogs    traplistener  zephyr
```

for example cd to geo directory to check georedundant logs
