

Administration

- Enable WAN access
- Update PFSense CLI

Enable WAN access

To enable wan access go into ssh and run the following command

```
pfctl - d
```

to enable protection

```
pfctl -e
```

Update PFSense CLI

Run a backup

```
cp /usr/local/share/pfSense/pkg/repos/pfSense-repo.abi /usr/local/share/pfSense/pkg/repos/pfSense-repo.abi.backup
```

```
23.05-RELEASE][admin@pfsense.htf.com.mx]/root: pkg-static -d update
```
